Light rail wire replacement will affect service on RTD’s C, E and H Lines this weekend

Bus shuttles will be offered between affected stations

DENVER (July 9, 2020) – Light rail service on the Regional Transportation District (RTD)’s C, E, and H Lines will be affected from 3 a.m. Saturday through the end of the service day on Sunday, as overhead catenary system (OCS) wire is replaced along portions of all three lines.

The OCS wires deliver power to the light rail vehicles through the pantograph that extends upward from the light rail vehicles and makes contact with the wire.

While this work takes place, there will be no service between Alameda and I-25•Broadway stations, Evans and 10th•Osage stations on the C Line, and Union Station and Louisiana•Pearl stations on the E and H Lines.

Bus shuttles between stations will be provided at the following locations:

- 10th•Osage Station – board next to platform
- I-25•Broadway Station – board at Gate A-2
- Evans Station – board at Gate C
- Louisiana•Pearl Station – board at Gate B

Riders should plan for additional travel time between affected stations. Scheduled service on all three lines will resume Monday.

Passengers are required to wear masks and asked to practice social distancing while riding on or waiting to board RTD vehicles.
ABOUT RTD

The Regional Transportation District develops, operates and maintains a public transportation system that meets the transit needs of close to 3 million people within an eight-county service area in the Denver Metro region. RTD’s buses, rail lines, shuttles and additional services provide approximately 100 million annual passenger trips.
